

Basic Data

Description

Hammer drill bits for electro pneumatic rotary hammer drilling machines with SDS taper.

Suitable for

Concrete, brick, stone and rock.

Material

High quality tungsten carbide tip with chrome vanadium steel shaft.

Approval

In accordance with DIN 50049-3.1 A

Advantages

- Special quality chrome vanadium steel
- SDS shank fits a wide range of hammer drilling machines
- Wide complete range includes long drill bits for difficult drilling situations

Basic Data

Description

Range of screw bits and magnetic holders which is adapted to our range of installation screws.

Suitable for

Bits: Screws with cross recess.

Magnetic holders: Screws with 1/4"-5/16" hexagon head. TST and TSB screws.

Advantages

- Screw bit range adapted to our screw range
- Phillips or Pozidriv cross recess, available in three sizes
- Many lengths, varying between 25 mm and 110 mm
- Long bits well suited for access in limited spaces
- Hardened steel provides good durability and fit
- Magnetic holders suit all our hexagon-head collar screws
- Extra thin, long magnetic holder for access in limited spaces
- Combination bits Pozidriv and Phillips in either end
- Standard 1/4" hexagon drive end
- Packed in twos in blister package

Material

Steel, hardened in a special process.

Standards

ISO 1173-1975

DIN 3126

Packaging

Blister package, except TST-V 12.7×43 which is packed in a plastic bag.
